

# Gigasecond in Scala

[Readme \(readme\)](#)[Test Suite \(../gigasecond\)](#)

## Gigasecond

Write a program that will calculate the date that someone turned or will celebrate their 1 Gs anniversary.

A gigasecond is one billion ( $10^{**9}$ ) seconds.

The Scala exercises assume an SBT project scheme. The exercise solution source should be placed within the exercise directory/src/main/scala. The exercise unit tests can be found within the exercise directory/src/test/scala.

To run the tests simply run the command `sbt test` in the exercise directory.

For more detailed info about the Scala track see the help page (<http://help.exercism.io/getting-started-with-scala.html>).
